Book Condition: New. Publisher/Verlag: Springer, Berlin | It is interesting to observe the evolution of medical education over the years. The massive textbooks of the past have almost disappeared except as works of library reference. In their place we now find an increasing number of publications which explore the detail of particular specialities and sub-specialities. Once the young surgeon has acquired his basic knowledge of surgery in general (as it is now called), postgraduate education, whilst seeking to maintain the general scientific and humanistic principles of surgery, is forced to provide specialised reference works in a whole variety of fields, amongst which the postgraduate will choose his own future interest. This tendency emphasises the importance of the Conference on Surgery of the Shoulder organised by Professor Kessel and his colleagues. This first inter national gathering of surgeons and others in related disciplines who are interested in the disorders of the shoulder was self-funded under the aegis of the Institute of Orthopaedics and University of London, and it is to be hoped that other Universities, hospitals and medical foundations will give maximal financial and moral support for further ventures of this kind. This volume places on record the concepts and practices of those interested in the injury and disease of the shoulder joint, and thus becomes a reflection of our knowledge in this field in the second half of the twentieth century. | Codman - His Influence on the Development of Surgery of the Shoulder.- Section I. Painful Arc Syndromes.- 1.1. Classification of the Painful Arc Syndromes.- 1.2. The Role of Coracoacromial Arch Impingement as a Cause of Attrition of the Rotator Cuff.- 1.3. Decompression of the Subacromial Space: An Anatomical Study.- 1.4. The Surgical Treatment of Rotator Cuff Impingement.- 1.5. Acromioplasty in the Treatment of Rotator Cuff Impingement: A Preliminary...
