Date :2010-07-01 version 1. This book is the higher the Eleventh Five-Year plan quality teaching materials. taking into account the 21 century. China's higher education curriculum reform to reduce the theory of teaching hours. increasing the need for hours of practice teaching written. The book has eleven chapters. focuses on the basic concepts of thermodynamics. the basic law of the thermodynamic properties of refrigerants. heat and thermal cycle process analysis and calculations. This writing. in accordance with the necessary and sufficient principle. stressing the basic theory and basic concepts of thermodynamics discussion. concise. layman's language. focusing on application of basic theory the reader to analyze and solve practical engineering problems. Each chapter is equipped with the knowledge points. thinking problems and exercises. the book is accompanied by a variety of commonly used charts. E-book has a corresponding lesson plans. can be provided to teachers and readers as a reference. This book can be used as thermal engineering colleges and Power Engineering. Building Environment and Equipment Professional. Process Equipment and Control Engineering. and oil and gas storage and transportation of professional materials. but also for the engineering and technical officers. Contents: Preface Introduction Section I describes the main symbol of energy and thermal energy conversion devices use Section III Introduction to Engineering Thermodynamics work process object of study and research methodology of engineering thermodynamics main content of the fourth quarter and learning the basic concepts of the first chapter a thermal system status and Section III the basic equilibrium state parameters and status parameters plot during the fourth quarter with the quasi-equilibrium process reversible process V VI thermodynamic cycle power...
